Data Analyst

I have four years of experience facilitating data-driven decision-making across sectors as a versatile data analyst. Skilled in Tableau, SQL, Python, and Power BI, I increased sales for a leading import/supply company by 30% by providing comprehensive reports on product performance and customer patterns in India. I previously handled Somaiya College's analytics and attendance monitoring, producing vital insights to raise student engagement. Adept at converting brutal facts into suggestions that stakeholders can implement. I was committed to using data to improve operations and find fresh opportunities.
